The following list is of some of the best movies you can download right now. How can you play Disney Princess Enchanted Journey on your computer? Disney Princess Enchanted Journey is available for Windows and you can download it here. All these files are tested by our staff to ensure the best experience. Q: Get last tag for a specific tag using BeautifulSoup I have the following issue. I want to extract the last tag for every class that has a specified tag. For example, if I want all the div tags inside a section class with a specific tag (lets say ), I would like to have in my output, each one of the last div tags in each section that contains that specific tag. The code: 

```
import urllib from bs4 import BeautifulSoup import urllib2
opendata = open(' ', 'r') soup = BeautifulSoup(opendata) for x in soup.findAll('section', attrs={'class':'section-container'}): a = x.findAll(item => item.name == 'p') n = a[-1].p print n
```

 This obviously doesn't work because findAll() expects a string and I'm looking for a div tag with the tag p inside it. This script returns all the tags inside all the tags, I want only the last of all tags that have a tag inside it. A: You can use itertools.groupby from bs4 

```
import BeautifulSoup import 570a42141b
```
