AutoCAD [Win/Mac] [2022-Latest]

There is an extensive market for commercial software; the largest of the roughly 60 companies that produce CAD software is Autodesk (from 2005 to 2016, Autodesk was the largest software company in the world). Autodesk also produces design tools for the home and the workplace such as AutoCAD LT, which runs on Windows and Mac OS X and offers 2D drafting as well as DWG editing. Autodesk also offers construction software and other areas of design such as architecture, civil engineering, and industrial design. The most recent version of AutoCAD is AutoCAD 2017. It was released on September 14, 2016, with the 2017 release of AutoCAD and has received many accolades, including the annual Red Herring Best Overall Innovation award in 2017.[1][2][3] History AutoCAD was created by John Walker, a draftsman at AutoCAD's originator, Alchorne Systems, where he was an early member of the production team. The first version of AutoCAD, 1.0, was released in 1982. In 1983, AutoCAD was available for the IBM PC. In 1985, the company was acquired by Autodesk and was incorporated into its overall product line. The beta of AutoCAD 2000 was released in October, 1998. After a successful pilot study with the U.S. Navy, AutoCAD 2000 received U.S. Federal Government approval in December, 1998 for use on NAVAL ships. A design revision is a major update of a previous version of the software. Versions of AutoCAD Windows and Mac versions of AutoCAD were sold from 1982 through 2005 and then were made available only as upgrades through the subscription program. In 2016, AutoCAD 2016 replaced AutoCAD R16. AutoCAD 2016 allowed users to open the DWG format files that had been saved by the earlier versions of the software. The major difference between AutoCAD 2016 and R16 was that AutoCAD 2016 did not have a perpetual license and could only be purchased as a subscription. Autodesk announced in 2017 that AutoCAD 2017 would replace R16. Version 20 was released in 2012. AutoCAD LT (Long Term

The plugin architecture allows external developers to write custom tools and even customize the GUI. The AutoCAD 2018 product, which started shipping in May 2017, is based on the 32-bit.NET Framework 4.6.1, and uses the 64-bit version of Microsoft Visual Studio 2017 for development.
